

Coloured light unit

FL 800 / 800 S

for fixing in IR-cabins

FL 800

Coloured light unit with 8 special fluorescent coloured light lamps each 8 W in red, yellow, green and blue. The unit can be fixed beneath the ceiling or onto the wall of an IR-cabin. Lamps and starters are easily accessible.

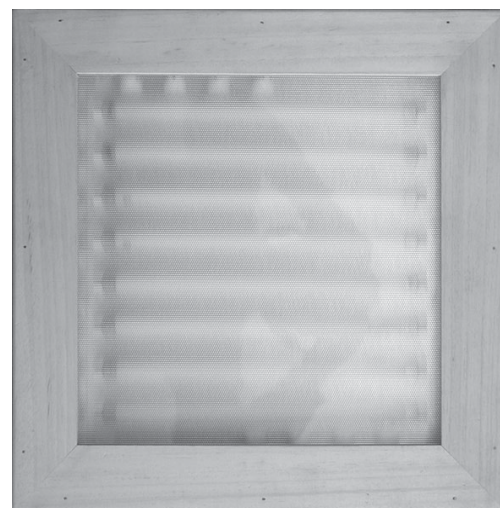

Safety glass cover with special grain for optimal light dispersion and resulting uniformly light irradiation in the cabin.

FL 800 S

Coloured light unit as described above but with four switches for each single coloured light lamp. Each switch controls a colour. Several lamps can be switched on simultaneously.

The coloured light unit can be operated using the coloured light control units 60 FL, 48 FL, ECON F1, EMOTEC C55, EMOTEC DC 9000, EMOTEC HIC 75* and EMOTEC HCS 9003*.
